LGU DAET EXPANDED SCHOLARSHIP PROGRAM

End-to-End Workflow Reference for the Scholarship Monitoring System

Application | Screening | Compliance Monitoring | Approval | Payout

Development Reference

Purpose. This document translates the scholarship ordinance framework into practical system workflows, statuses, decision gates, and role permissions for implementation in the LGU Daet Scholarship Monitoring System.

Workflow Overview

APPLICANT -> PRELIMINARY_QUALIFIED -> FOR_SCREENING -> QUALIFIED -> SELECTED -> FOR_FINAL_COMPLIANCE -> APPROVED_SCHOLAR -> ACTIVE -> SEMESTER_COMPLIANCE -> PAYOUT_ELIGIBLE -> PAID -> NEXT_SEMESTER

- Branch statuses: DEFICIENT, NOT_QUALIFIED, NOT_SELECTED, INELIGIBLE, WITHHELD, SUSPENDED, TERMINATED, GRADUATED.
- Four statuses must remain independent: Scholar Status, Semester Compliance Status, Masterlist Status, and Payout Status.

1. Application Workflow

Purpose: Create a complete applicant record and determine whether the applicant may proceed to formal screening.

DRAFT -> SUBMITTED -> FOR_PRELIMINARY_REVIEW -> DEFICIENT / PRELIMINARY_QUALIFIED -> FOR_SCREENING

1.1 Draft

- Create applicant profile and application number.
- Capture full name, birth date, address/barangay, contact details, parent/guardian, school, intended course, applicant type, and priority-sector category where applicable.
- Staff may create, edit, and delete draft records; Coordinator may view and edit.

1.2 Submitted

- Record date received, receiving staff, application number, and documentary checklist.
- After formal submission, changes to identity-critical fields must be logged.

1.3 Preliminary Review

- Verify Daet residency.

- Verify parent/guardian voter requirement.
- Check academic qualification, indigency/income, good moral standing, no other scholarship, and required admission/enrollment information.

1.4 Deficient

- Use when documents or information are incomplete.
- Record deficiency reason, missing requirements, date notified, and compliance deadline.
- Transition back to FOR_PRELIMINARY_REVIEW after deficiencies are corrected.

1.5 Preliminary Qualified

- Applicant satisfies initial documentary and eligibility requirements.
- Transition to FOR_SCREENING.

Application Blocking Conditions

- Missing required identity data.
- Residency not verified.
- Mandatory documents missing.
- Clear failure of a non-overridable eligibility condition.
- Duplicate application.

2. Screening, Examination, and Interview Workflow

Purpose: Evaluate qualified applicants before final selection and scholarship approval.

FOR_SCREENING -> SCREENING_IN_PROGRESS -> FOR_EXAM -> EXAM_COMPLETED -> FOR_INTERVIEW -> EVALUATED -> QUALIFIED / NOT_QUALIFIED

2.1 Screening

- Screening Committee reviews the application and supporting evidence.
- Record screening date, result, evaluator, and remarks.
- Staff may prepare records but should not finalize the screening decision.

2.2 Examination

FOR_EXAM -> SCHEDULED -> PRESENT / ABSENT -> EXAM_COMPLETED

- Store exam date, venue, exam batch, score, rank, and pass/fail result.
- ABSENT may move to RESCHEDULED only when authorized.

2.3 Interview

FOR_INTERVIEW -> INTERVIEW_SCHEDULED -> INTERVIEW_COMPLETED

- Store interview date, interviewers, parent/guardian attendance when required, result, and remarks.

2.4 Final Evaluation

- Combine eligibility, exam result, interview, priority classification, and documentary compliance.
- Final outcome: QUALIFIED or NOT_QUALIFIED.

3. Selection and Scholarship Approval Workflow

QUALIFIED -> FOR_SELECTION -> SELECTED -> FOR_FINAL_DOCUMENTS -> DOCUMENTS_COMPLETE -> FOR_APPROVAL -> APPROVED_SCHOLAR

Alternative: FOR_SELECTION -> NOT_SELECTED

3.1 Selection

- Rank applicants against available slots, program category, priority-sector rules, degree/non-degree allocation, and authorized criteria.
- Preserve rank, selection score, slot category, and selection basis.

3.2 Final Documents

- Track enrollment/registration proof, Scholarship Agreement, final certifications, IDs, and other required post-selection documents.
- Each document has its own status: PENDING, SUBMITTED, VERIFIED.

3.3 Scholarship Agreement

NOT_PREPARED -> PREPARED -> FOR_SIGNING -> SIGNED

- Record agreement/control number, date, scholar signature, parent/guardian signature where applicable, and authorized LGU signatory.

3.4 Final Approval

- Approval requires verified final documents, signed agreement, confirmed enrollment, and valid selection.
- Staff prepares and recommends; Coordinator approves, returns, or rejects.

4. Active Scholar and Semester Creation

Once approved, the scholarship master status becomes ACTIVE. A separate scholar-semester record must then be created for every academic period. Historical semester data must never be overwritten by the next semester.

5. Semester Compliance Monitoring Workflow

SEMESTER_OPEN -> REQUIREMENTS_PENDING -> FOR_COMPLIANCE_REVIEW -> COMPLIANT / DEFICIENT / NONCOMPLIANT -> ELIGIBLE / INELIGIBLE

5.1 Semester Requirements

- Certificate of Registration (COR).
- Certificate of Grades (COG).
- Enrollment proof and any other approved semester/payout requirement.

5.2 Requirement Statuses

NOT_SUBMITTED -> SUBMITTED -> FOR_VERIFICATION -> VERIFIED / DEFICIENT / WAIVED / NOT_APPLICABLE

5.3 Compliance Review

- Verify current enrollment, full academic load, school/course, GWA, failing grades, incomplete grades, dropped subjects, and required documents.

5.4 Outcomes

- COMPLIANT -> ELIGIBLE_FOR_SEMESTER.
- DEFICIENT -> return to FOR_COMPLIANCE_REVIEW after correction.
- NONCOMPLIANT -> FOR_COORDINATOR_REVIEW, then CONTINUE, WITHHOLD_PAYOUT, SUSPEND, TERMINATE, or OVERRIDE_APPROVED.

6. Course and School Change Workflow

REQUESTED -> FOR_REVIEW -> APPROVED / REJECTED -> IMPLEMENTED

- Record previous and new school/course, reason, requested semester, supporting letter, decision, and approving authority.
- System must detect prior approved course changes and enforce ordinance restrictions unless an authorized override is recorded.

7. Suspension, Termination, and Reinstatement

- Core scholar statuses: ACTIVE, FOR_REVIEW, SUSPENDED, TERMINATED, DROPPED, GRADUATED.

ACTIVE -> FOR_STATUS_REVIEW -> SUSPENDED

SUSPENDED -> FOR_REINSTATEMENT -> ACTIVE

ACTIVE / SUSPENDED -> FOR_TERMINATION -> TERMINATED

- Every action must record reason, supporting evidence, effective semester/date, approving officer, and audit event.

8. Masterlist Workflow

DRAFT -> FOR_STAFF_REVIEW -> FOR_COORDINATOR_APPROVAL -> APPROVED -> FINALIZED

- Draft pulls active, enrolled, compliant, and payout-eligible scholars.
- Staff verifies name, school, course, year level, requirements, eligibility, amount, and duplicate entries.
- Coordinator may approve, return, remove, add an authorized scholar, or override with a reason.
- Finalized masterlists become read-only; changes require reopening/versioning such as Masterlist v1, v2, etc.

9. Payout Eligibility Workflow

NOT_EVALUATED -> FOR_PAYOUT_CHECK -> PAYOUT_ELIGIBLE / PAYOUT_WITHHELD

- Eligibility requires active scholar status, correct semester, complete requirements, verified semester compliance, inclusion in an approved masterlist, no suspension/termination, and no unresolved blocking issue.

- Staff should not be able to manually force PAYOUT_ELIGIBLE without system validation.

10. Payout Batch Workflow

DRAFT -> FOR_REVIEW -> APPROVED -> FOR_PROCESSING -> READY_FOR_RELEASE -> RELEASED -> CLOSED

10.1 Draft and Review

- Create batch number/name and assign award number, scholar, amount, semester, and eligibility.
- Validate no duplicates, exact amount, masterlist inclusion, correct semester, and payout eligibility.

10.2 Approved and Processing

- Coordinator approves the batch.
- After approval, ordinary Staff cannot change scholar, amount, or award number without reopening.

FOR_FINANCIAL_PROCESSING -> FOR_ACCOUNTING_CHECK -> FOR_TREASURY_CHECK -> FOR_APPROVAL_SIGNATURE -> READY_FOR_RELEASE

10.3 Released

- Record actual release date, amount, receiver, signature/reference, releasing officer, and payout window/batch when applicable.
- Payout entry becomes RELEASED.

11. Unclaimed and Withheld Payouts

READY_FOR_RELEASE -> UNCLAIMED

FOR_PAYOUT -> WITHHELD -> PAYOUT_ELIGIBLE (after resolution)

- Withheld records require reason, date, authorizing officer, and required corrective action.
- Do not delete withheld or unclaimed records; preserve them for audit and follow-up.

12. Semester Closing Workflow

OPEN -> FOR_CLOSING -> CLOSED

- Verify all active scholars are accounted for.
- Resolve compliance, payout, withheld/unclaimed, suspension/termination, and masterlist states.
- After closing, make the semester read-only except for Coordinator-authorized corrections.

13. Graduation Workflow

ACTIVE -> FOR_GRADUATION_VALIDATION -> GRADUATED

- Store graduation date, completed course, school, last semester, and final scholarship status.
- Graduated scholars remain searchable but are excluded from future semester generation.

14. Role Permission Matrix

Action	Staff	Coordinator	System Administrator
Create scholar	Yes	Yes	Technical only
Edit basic record	Yes	Yes	Technical only
Receive documents	Yes	Yes	No policy role
Verify documents	Yes	Yes	No
Enter exam results	Yes	Yes	No
Approve qualification	Recommend	Yes	No
Select scholar	No	Yes	No
Final scholarship approval	No	Yes	No
Create semester record	Yes	Yes	Technical only
Verify COR/Grades	Yes	Yes	No
Mark compliant	Yes	Yes	No
Override eligibility	No	Yes	No
Approve course/school change	No	Yes	No
Suspend scholar	Recommend	Yes	No
Terminate scholar	No	Yes	No
Prepare masterlist	Yes	Yes	No
Approve masterlist	No	Yes	No
Finalize masterlist	No	Yes	No
Create payout batch	Yes	Yes	No
Approve payout batch	No	Yes	No
Record actual release	Yes	Yes	No
Reopen finalized record	No	Yes	Technical support only
Manage users and roles	No	Limited	Yes
Delete audit logs	No	No	No

15. Critical System Rules

1. Separate Scholar Status, Semester Compliance Status, Masterlist Status, and Payout Status. Never collapse them into one generic status field.
2. Every semester must create a new scholar-semester record. Do not overwrite prior semester data.
3. Finalized masterlists and approved payout batches must be immutable to ordinary users; corrections require versioning or controlled reopening.
4. Overrides, removals, cancellations, reinstatements, and reopenings must always require a reason and produce an audit-log event.

5. System Administrator privileges are technical. They must not automatically confer scholarship eligibility, selection, or financial approval authority.
6. Payout eligibility should be derived from validated conditions rather than manually toggled by Staff.

16. Recommended Operational Approval Chain

Staff Encoding -> Staff Verification -> Coordinator Approval -> Masterlist Finalization -> Payout Batch -> Financial Processing -> Release

This chain provides a clear separation of duties while keeping the workflow practical for an internal LGU monitoring system.

Implementation note

The workflow is intended as a development reference and should be configured together with the exact controlling ordinance, later amendments, approved LGU procedures, and authorized financial-processing requirements.
